

Première Contrôlée → m.c' & (en ligne) Vignette & → autre chose.
Vol —————→ P ↗

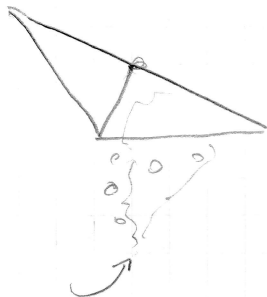

NOBITO RING VOLUME

→ at the exhaust? (before CO_2 filter)

Like a PLUVIOMETER

c]

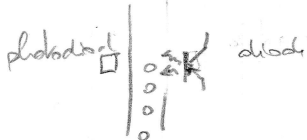

country number
of flips.

Can be done in a NORIA way

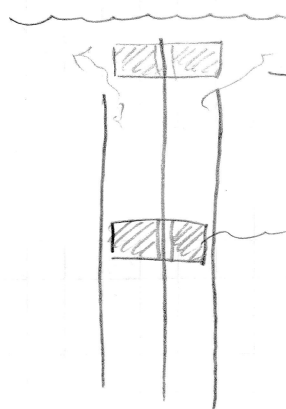

D

calibrated hole
=> " " bubble

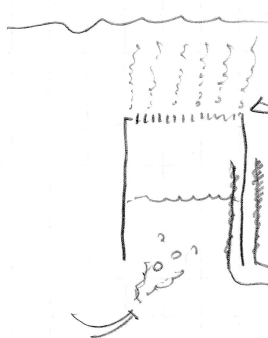

A

need to discharge all
at once.

"weight" \Leftrightarrow 0,5 L of water

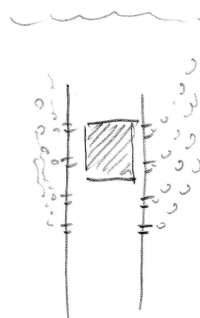

B

fine grid let
the air go out "slowly"

capacitive sensing

Node between A & B

height is depending on
volume / Δt
of air

⇒ monitoring height of the mobile.
(with light, magnetic ---)
